

DIY Research Data Management Training Kit for Librarians: Questions for reflective writing and discussion

Data sharing (see Sharing, Preservation and Licensing in MANTRA)

- 1) Have you, or students or researchers you know, experienced barriers in obtaining data for re-use similar to the case study or the video?
- 2) Time travel to ten years in the future. Do you think the case study and video will be out of date? Why?
- 3) What are the drawbacks of informal data sharing (as opposed to open publication)?
- 4) What are the strongest motivators for academics to openly publish their data?
- 5) How useful is the shock value of scientific fraud cases for creating culture change in open sharing practices? Would you use these examples for teaching students?
- 6) What can a data repository do that is difficult for individual academics to do themselves?
- 7) What do you think are the qualities of a “trusted digital repository”?
